

GREENWORX

Cleaner. Greener. Smarter.

BIO CLEANING SOLUTIONS PRODUCT PORTFOLIO

GreenWorx

CLEANING SOLUTIONS

INTRODUCTION

Green Worx Cleaning Solutions introduces an effective range of cleaning products with bio **enzymes** that provide many benefits to various industries and all households.

Following extensive research Green Worx teamed up with the world's foremost technologically advanced bio enzyme and sustainable surfactant producers to offer reliable, affordable and effective green cleaning solutions.

OUR GLOBAL GREENTAG CERTIFICATION

Issued by Perfect Word Consulting (Pty) Ltd

In the world of "green", claims of eco-friendliness and biodegradability abound. Sadly, however, these claims can often not be substantiated, the products and services are not truly green, and consumers and businesses are duped into harming the planet in a different way.

For this reason, the Global GreenTag certification entails a stringent approval process that requires the substantiation of all green claims. This month, local manufacturer, Green Worx Cleaning Solutions, was certified by Global GreenTag as having truly green products.

Global GreenTag is one of the world's most robust, trusted and widely recognised ecolabels. "We independently assure that every product is fitness tested and certified under one of our two leading certification programmes that use world's best scientific methods," confirms the Global GreenTag website. "That's why we have earned the reputation and trust of thousands of buyers, hundreds of companies and numerous green building councils, certification bodies and governments around the world."

Green Worx, is proud of this achievement. "This certification is the culmination of many years of hard work. We don't believe in 'greenwashing' - which not all South African manufacturers can claim. Our products, and all of the ingredients used to create them, have a great impact on dirt, and no impact on the environment. That's our commitment to creating a world that is cleaner, greener and smarter."

Consumers and businesses are assured that Global GreenTag certified products have passed the world's toughest standards to protect them, their employees, and their families' health and safety. The focus is placed on minimising the impact on a finite planet, putting the power of selection back into the hands of well-informed consumers.

The GreenTag Programme is intended to fill a current void, nationally and internationally, for a consistent green product rating scheme that is scientifically derived, life cycle assessment based, and includes appropriate assessment of whole of life and holistic sustainability. "This is essential to real credibility in the industry, avoiding fly-by-night organisations that play on the need to retain precious resources in order to make a quick profit."

GreenTag strives to simplify the green product sector research and help consumers and procurement professionals to make their decisions in full light of the ecological quality, health, resource and social impacts of their product or supply chain selection. "We're proud to display the GreenTag logo on our labels, and are committed to continue manufacturing products that are worthy of the certification."

WHAT ARE BIO ENZYME PRODUCTS?

Ignorance, as they say, is bliss - except when it involves "green" practices that are merely harming the environment in a different way, or having no effect at all. As the popularity of "eco-friendly" products continues to rise, manufactures and distributors are attempting to differentiate their products through the use of inaccurate statements, skewed facts and downright myths.

In this instance, knowledge truly is power - especially when it comes to reading between the marketing material lines to determine whether or not green cleaning products are truly green. Usually, companies that sell "green" cleaning products position these items within one of four categories; probiotic products, enzymatic products, bacterial products (biological), or essential microorganism products (microbes and their metabolites).

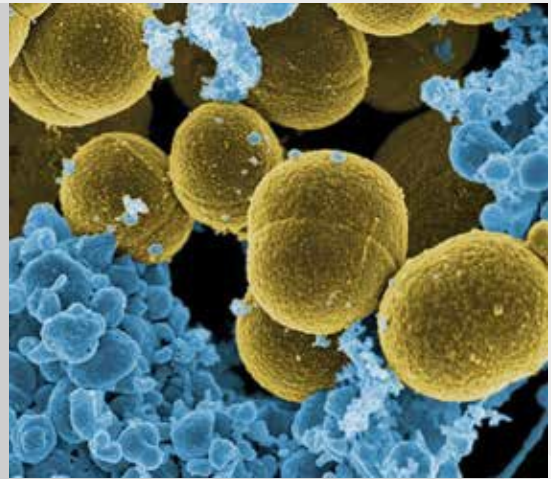

While **probiotics** are certainly good for your gut health, they do not make the best cleaning products. These are friendly bacteria that live in the intestines, promote healthy digestion and eliminate pathogens, other bacteria and viruses. Yes, these probiotics do produce many different kinds of enzymes (beneficial to the human body) - but outside of the body, they do not produce enough enzymes to degrade organic waste, making them ineffective in cleaning products.

Bacterial products, on the other hand, utilise these single celled organisms that have the ability to reproduce by simple cellular division. When using the correct bacteria, nutrients in the environment are recycled, as organic matter is broken down into simple compounds such as carbon dioxide and water. These are the only products that can naturally penetrate the bad bacteria's biofilm, which forms a protective layer against other chemical cleaners.

Enzymes, which are produced by bacteria, are proteins that act as catalysts, thereby accelerating the rate of reaction with a substrate. Enzymes are substrate specific, meaning that different enzymes can be put into particular products in order to clean distinctive kinds of dirt. It is important to note that enzymes are not living things. Therefore they cannot adapt to different conditions. In contrast, bacteria are living organisms that adapt to their environment and produce specific enzymes that break down organic matter, such as fats, oils, cellulose, xylan, proteins and starches.

As a result of this, and the short life-span of an enzyme, living bacteria is preferred in products, as it constantly produces fresh enzymes. However, some cleaning products can be "boosted" by adding a certain amount of prepared enzymes to the product to begin degrading the organic matter. While these enzymes die out, the bacteria present reproduce, creating more enzymes to continue the cleaning process.

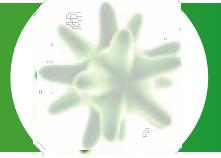

Essential microbes, or Effective Microorganisms (EM[®]) is a brand name referring to a family of microbial-based products using a technology developed by Japanese scientist, Dr Teruo Higa. The main product, EM-1[®], is a liquid bacterial product comprising three groups of microbes: Yeast, Photosynthetic Bacteria, and Lactic Acid Bacteria.

EM-1[®] works together with local and native beneficial microbes, creating a synergy among microorganisms and larger forms of life including; insects, worms, pets, livestock, and people. All the formulations and intellectual property are owned and managed by EM Research Organization in Okinawa, Japan (EMRO). However, when claiming "green" product status, it is highly likely that EM is non-functional as a cleaning agent, due to the fact that no enzymes are released to degrade the organic soil. As such, cleaning is achieved through the chemical based surfactants at work, which are not considered eco-friendly, if not plant derived.

It is clear that a carefully calculated combination of bacterial strains (considered beneficial microorganisms) and added enzymes, each selected for its efficiency at degrading certain waste materials, is the winning formula in green cleaning. When used correctly, these products are completely safe and effectively tackle the wide variety of compounds found in the waste system.

Enzymes used in Green Worx Products

Bacteria Type: Bacillus consortium producing the following enzymes;

PROTEASE

- breaks down proteins (e.g. meat, excreted/secreted proteins) into amino acids

LIPASE

- breaks down fats/grease into fatty acids and glycerol; if not broken down, fats can go rancid and lead to malodours and blocked drains/fat grea traps

AMYLASE

- starch acts as a glue for dirt; amylases catalyse the breakdown of starch into sugars which are then further used as ythe

CELLULASE

- breaks down cellulosic material

UREASE

- catalyses the hydrolysis of urea into breakdown products

What this means

- the bacillus uses the multitude of enzymes produced to break down the components of malodour and staining, to provide microbial cleaning at the smallest level of dirt/contamination.

XYLANASE

- helps in breaking down plant cell walls

ESTERASE

- splits esters into an acid and an alcohol in a chemical reaction with water (hydrolysis)

PRODUCTS

- 1 BIO TECH PRODUCT RANGE
- 2 ODORITE PRODUCTS
- 3 ODORITE ULTRA PRODUCTS
- 4 BLUE MAC PRODUCT
- 5 URI POD PRODUCT
- 6 MICROZYME PRODUCTS
- 7 CONSUMER BIO-ENZYME PRODUCTS

i QUICK REFERENCE:
Products, usage & pricing

BIO TECH PRODUCT RANGE

- A**
 - Bio Tech GTX 1 RTU
 - Bio Tech GTX 10 FF Concentrate
 - Bio Tech GTX 20 FF Concentrate

- B**
 - Bio Tech GTX 20 NF Concentrate

- C**
 - Bio Tech GT Foam Hand Soap
 - Bio Tech GT Liquid Hand Soap
 - Bio Tech GTX Footwear Cleaner & Deodoriser

- E**
 - Bio Tech GT Probiotic Surface Sanitising Spray

BIO TECH PRODUCT RANGE

The Bio Tech microbial consortium range demonstrates superior enzyme performance for use in multiple applications. Bio Tech products exhibit a broad range of degradation capabilities needed for a multi-purpose product efficacious in the maintenance of drain lines and grease traps, improving septic and waste degradation, and cleaning and odour control; making these products technologically the most advanced on the South African market. These products contain six strains of Bacilli and six enzymes with exceptionally high colony forming spores.

- Bio Tech GTX 1 RTU
Multi-Purpose bio-formulation - Ready to Use
- Bio Tech GTX 10 FF Concentrate
- Bio Tech GTX 20 FF Concentrate
Multi-Purpose bio-formulation concentrates

BENEFITS

- Drain lines – degrades and eliminates organics found in drain lines, regular addition maintains a cleaner and odour-free system
- Septic and waste treatment – maintains effective activity in septic systems, eliminating the need for excessive pumping, eliminates odours caused by incomplete digestion of malodorous volatile fatty acids
- Bathroom cleaning and odour control – penetrates cracks, crevices and pores of surfaces where organics accumulate, removing the organics and leaving a visually cleaner surface, provides long term odour control by removing the organics that cause odours, prevents their return

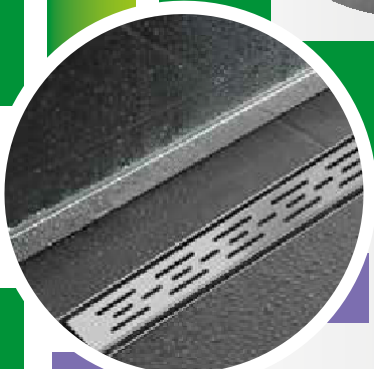

BIO TECH PRODUCT RANGE

- **Bio Tech GTX 20 NF Concentrate**

A consortium of high bacterial specification, multi-strain, spore-based concentrate formulas for onward manufacture

Bio Tech GTX concentrates are liquid bacterial concentrates that can be used for onward manufacture of products offering a high bacterial specification, multi-strain, spore-based product for use in grease traps and drain maintenance applications. These products are specifically formulated for grease traps, heavy duty drain line maintenance, waste water treatment and the degradation of animal fats and vegetable oils in solid or liquid form.

BENEFITS

- Most formulators have the capability of producing liquid products; these products allow formulators to have a presence in the lucrative biological grease trap product market without extensive specialist knowledge
- The most common 'bio' products in the industrial, institutional and consumer markets are liquids - the GT concentrates series is designed specifically for this use
- Simple format that can easily be diluted in water, while a simple dilution format allows for easy calculation
- Concentrates are easy to handle and store
- Highly effective and proven natural technology
- Reduces the requirement and frequency of mechanical treatment to unblock drains due to grease build-up
- Product can be sold to service companies to be retailed as part of their regular maintenance service programmes
- Grease is partially degraded by the time it reaches treatment plants, reducing system overload

EASY TO DILUTE, USE & STORE

BIO TECH PRODUCT RANGE

- Bio Tech GT Foam Hand Soap
- Bio Tech GT Liquid Hand Soap

Designed to keep hands clean through improved hand hygiene. This is one of the most important steps we can take to avoid getting sick and spreading germs to others. Many diseases and conditions are spread by not washing hands with soap and clean, running water.

- Bio Tech GTX Footwear Cleaner and Deodoriser (Ready to Use)

Multi-Purpose bio-formulation surface cleaner and deodoriser - Ready to Use Formula

Bio Tech GTX Footwear Spray is a bio enzyme spray for footwear. The spray eliminates and prevents smells and reduces actively the risk of fungi growth.

C

BENEFITS

- Risk reduction
- Better cleaning
- Forms a healthy and protective micro flora on the hands
- Offers a viable alternative to current processing techniques using a bio-technical approach

- Minimises risk of foot fungus
- Natural active odour control
- Restores the microflora of the foot

BIO TECH PRODUCT RANGE

- **Bio Tech GT Probiotic
Surface Sanitising Spray**

*A new age surface hygiene sanitising
probiotic bio-enzyme technology.*

This Sanitising Spray is designed to make surfaces clean and hygienic. The definition of sanitising is “to make (something) more palatable by removing elements that are likely to be unacceptable or controversial”. Keeping surfaces clean through improved hygiene is one of the most important steps we can take to avoid getting sick and spreading germs. Many diseases and conditions are spread by not practising proper hygiene protocols.

APPLICATIONS

Bio Tech GT Probiotic Surface Sanitising Spray should be applied:

- Before entering a restricted or controlled health risk area
- Before, during, and after preparing or eating food
- Before and after caring for someone who is sick
- After using the toilet, changing diapers
- After blowing your nose, coughing, or sneezing
- After touching an animal, animal feed, or animal waste
- After touching garbage or any surface that may harbour germs or viruses

FEATURES & BENEFITS

- Bio Tech GT Probiotic Hygiene Sanitising Spray forms a healthy and protective micro flora on surfaces and skin
- It contains a consortium of six strains of Bacillus subtilis (Probiotic) and seven enzymes that act as broad spectrum anti-bacterials
- Disinfectants stop working as soon as they are dry/evaporated, but the Bio Enzymes / Probiotics in this product keep working, cleaning, and protecting surfaces for up to three days after each application
- Since skin is a dynamic environment that is constantly touching many different surfaces, repetitively being contaminated, and washed, the Bio Tech GT Probiotic Surface Sanitising Spray should be used on the hands and other hard surfaces several times per day
- Available in Bulk Pack Sizes – 25 litre and 5 litre Containers

ODORITE PRODUCTS

- G** Odorite Surfclean Concentrate 10 X FF

ODORITE PRODUCTS

- Odorite Drain Purge RTU
- Odorite Drain Purge Concentrate 10x

For effective wastewater treatment and odour control

These microbial consortiums demonstrate superior enzyme performance for use in multiple applications. The products exhibit a broad range of degradation capabilities needed for a multi-purpose product eicacious in maintenance of drain line and grease traps, improving septic and waste degradation and cleaning and odour control.

A

BENEFITS

- Drain lines and grease traps - degrades and eliminates organics found in drain lines and grease traps, regular addition maintains a cleaner and odour-free system
- Septic and waste treatment - maintains effective activity in septic systems, eliminating the need for excessive pumping, eliminates odours caused by incomplete digestion of malodorous volatile fatty acids
- Bathroom cleaning and odour control - penetrates cracks, crevices and pores of surfaces where organics accumulate, removing the organics and leaving a visually cleaner surface, provides long term odour control by removing the organics that cause odours and prevents their return

ODORITE PRODUCTS

- Odorite P-Disc Bulk (MOQ 15 Discs)
- Odorite P-Disc Holder 80gm (MOQ 12 Domes)

A premium product that eliminates organics and malodours found in urinals drain lines and toilet bowls, and all hard surfaces

These men's restroom solutions are aesthetically pleasing products that provide exceptional performance in keeping toilets odourless and trouble free - a must for the hygienic, eco-conscious person, hygiene cleaning contractor and green building owner. The products contain no harmful chemicals.

BENEFITS

- Degrades and eliminates organics found in the toilet and drain lines
- Regular use maintains a cleaner and odour-free system
- Maintains effective microbe and enzyme activity in septic systems by eliminating odours caused by incomplete digestion of malodorous volatile fatty acids
- Will penetrate cracks, crevices and pores of surfaces where organics accumulate, actually removing the organics (VOC) to leave a visually cleaner surface

ODORITE PRODUCTS

- Odorite Bio Cubes Each Bulk (MOQ 25 Cubes)
- Odorite Bio Cubes x 3kg Bucket
- Odorite Bio Cubes x 5kg Bucket

Bio-enzyme toss block for cleaning and odour elimination in urinals

Odorite Bio Cube has been specially designed to clean, reduce odours and to be environmentally friendly when compared to conventional chemical and or PDB deo blocks. Each block contains powerful biological cleaning agents, which are proven to maintain, clean, and deodorise urinals, including the u-traps and pipes.

BENEFITS

- New, improved, and now manufactured in South Africa under license
- Removes the cause of odours and contains a pleasant fragrance
- Suitable for most types of urinals and troughs
- Prevents blocked u-traps and pipes
- Contains non-pathogenic microorganisms
- Cleans the urinal and freshens the toilet cubicle
- Non-toxic, non-irritant and harmless to the environment

ODORITE PRODUCTS

- **Odorite Fem-Fresh**

Biological control of odours and microorganisms associated with female sanitary ware

Fem Fresh is a dry formulation for the biological control of odours associated with solid wastes contained in sealed sanitary bins. When waste materials from a range of processes are deposited in collection vessels to await disposal, a range of chemical and biochemical reactions can then occur to stimulate malodours. In sealed bins with minimal or restricted air exchange, anaerobic microclimates form very rapidly in waste materials. This provides ideal conditions for certain nuisance microorganisms to bring about the partial breakdown of organic substrates and/or to cause one of many transformations of organic materials present.

BENEFITS

- Contains **Fem Fresh Bio** technology to bind to odour molecules
- Contain a complex consortium of safe microorganisms (*Bacillus Subtilis*) specially selected for their ability to metabolise organic molecules associated with malodour and to outperform harmful microorganisms causing their death
- Contains a blend of natural mineral carriers well known for their ability to bind moisture and volatile inorganic molecules
- Pleasant fresh fragrance
- Convenient packaging for ease of use
- Easy and safe to dispose of
- Long lasting and cost effective
- Eco-friendly

ODORITE PRODUCTS

- Odorite Surgical Instrument Cleaner
- Odorite Surgical Instrument Cleaner Foamer

A premium four enzyme cleaning product that eliminates organics found on surgical instruments

Odorite Ultra Surgical Instrument Cleaner is a pre-treatment cleaning agent for use in recovering all reusable immersible (surgical/ medical) instruments prior to disinfection. The multienzyme action provides rapid results when used in soaking trays, ultrasonic baths or scope washing units.

E

BENEFITS

- Concentrated, rapid cleaning and neutral pH
- Free rinsing and 100% biodegradable
- Safe for all surgical instruments and scopes
- Low foam detergent formula
- Easy to rinse and use
- Safe for operator
- Will not harm any metals, plastic, rubber or insertion tubes

**RAPID CLEANING &
NEUTRAL pH**

100% BIODEGRADABLE

**WILL NOT HARM METALS,
PLASTIC, RUBBER OR
INSERTION TUBES**

As an Africa leader in our ISO certified facility, a certification that we meet and exceed with standards of quality assurance in production and customer service, this Green Worx CS product also bears the CE mark, which guarantees that our products comply with the European Medical Devices Directive 93-742-EEC Class 1.

ODORITE PRODUCTS

- Odorite Grime Away RTU
- Odorite Grime Away Concentrate 10 X

A premium natural citrus product for the effective cleaning of oils, grease and hydrocarbons on all surfaces

Odorite Grime Away, a 100% natural citrus cleaner is based on the natural solvent extracted from the peel of citrus fruits. The citrus cleaner is a highly concentrated, water based solvent solution for use as domestic, janitorial and industrial cleaners and degreasers. It replaces petroleum and chlorinated solvents.

BENEFITS

- Biodegradable
- Quick splitting, meaning it quickly separates from oils enabling both re-use of the cleaning solution and effective removal of the oils and contaminants before reclaim or disposal
- Contains advanced surfactant technology, coupled with the powerful natural orange solvent, enables most types of soiling, including chewing gum and tar, to be lifted from the substrate and rinsed away with water
- A water-soluble liquid containing natural orange terpenes
- Pleasant, natural orange fragrance
- Powerful cleaning ability and can be diluted
- Suitable for use where staff training may be a problem; ideal in schools, hospitals and institutions where selection of safer cleaning agents is important

ODORITE PRODUCTS

- **Odorite Surfclean Concentrate
10 X FF**

A unique bio-enzymatic formulation for cleaning hydrocarbons (Oil, petrol, diesel and grease) from all surfaces

On all surfaces, oily stains are often complex mixtures of automotive or maintenance products. Odorite Surf Clean contains a blend of microbes developed to break down these oily compounds. Combining the residual effects of patented bio-enzymatic technology with patent pending surfactant technology provides a product that is both safe and powerful. Odorite Surf Clean sets a new standard for cleaning concrete and other surfaces and is truly unique among cleaning and maintenance products.

BENEFITS

- A visually cleaner garage floor and driveway with less effort
- Enhance the office, factory and your home's curb appeal with a fresh, clean sidewalk
- Deep-clean tough stains in the workshop, factory garage and basement with a product that is safer for family and pets than the chemical alternatives
- More effective than a solvent-based product, yet is safe to use and friendly to the environment
- Use one product for a wide range of cleaning applications including garage floors, basements, outdoor furniture, tools and equipment.
- Non-toxic, non-flammable, biodegradable cleaner
- Contains virtually no volatile organic compounds (no toxic odours)
- Non-corrosive and non-irritating

ODORITE **ULTRA** PRODUCTS

- A** • Odorite Ultra Dishwashing Liquid
- B** • Odorite Urinal Sanitizer 310ml
- C** • Odorite Ultra Bio Floor & Tile Auto Scrubber
• Odorite Ultra Bio Floor & Tile Manual
- D** • Odorite Ultra Plus Laundry Liquid
• Odorite Ultra Plus Laundry Powder 3%
• Odorite Ultra Plus Laundry Powder 3% 5kg Bucket
- E** • Odorite Ultra DeepClean Concentrate 10X (Biological)
• Odorite Ultra DeepClean RTU Biological
- F** • Odorite Ultra DeepClean Enzymatic 30X Concentrate

ODORITE ULTRA PRODUCTS

A

• Odorite Ultra Dishwashing Liquid

Technically the most advanced multi-enzyme dishwashing detergent in Africa

Odorite™ Ultra Dishwashing Liquid is a fully formulated concentrate that is arguably the most technologically advanced in Africa, designed for both household and commercial/ industrial use. Although automatic dishwashers are common in many homes today, manual dishwashing (MOW) is still quite prevalent. In fact, even in homes with a dishwasher, pots, pans and other kitchenware often still need scrubbing or soaking before becoming completely clean - and MOW detergents are commonly added to the soak; but most people perceive dishwashing and soaking processes as tedious and laborious. Enzymes in MOW detergents can take significant scrubbing effort out of the manual dishwashing process and dramatically increase the effectiveness of soaking by

more than 50%, while still respecting skin sensitivity and removing even the most stubborn burnt on food soils.

BENEFITS

- Highly active - only small amounts dishwashing liquid required
- Free rinsing - dishes can be left to air dry without streaking
- All ingredients contain biodegradable surfactants
- Very economical
- Pleasant, fresh fragrance
- Will not dry out your hands and skin
- Less electricity required as it is effective in warm water
- Less energy is required to clean dishes
- Contains no caustic
- Anti-rust compound prevents rusting/ pitting on metals
- Bio-friendly (bio-cide) preservative system
- Remains highly active in both hard and soft water, and in warm or cold water
- Phosphate free

ODORITE ULTRA PRODUCTS

B

- **Odorite Urinal Sanitizer 310ml**

Multipurpose biological cleaning, deodorising, descaling and sanitising solution Non-toxic, non-corrosive, multipurpose digester with odour eliminator

This product eliminates pathogens. Odorite Ultra Urinal Sanitiser is a proprietary blend formulation of surfactant-based cleaners with a consortium of highly active bacterial spores and enzymes that will effectively degrade residual organics on the urinal wall, inside the toilet bowl and other hard surfaces. Organic deposits in nooks and crevices are often the result of common stains that will easily be eliminated. These deposits lead to stains and malodours. The effective degradation of organics results in odour control and stain removal, while breaking down crystals in the drain line and clearing it of blockages.

BENEFITS

- For use in urinals and surrounds
- A selected blend of highly active live bacteria cultures
- Contains a balanced buffer system that secures optimum enzyme activity
- Cultures are a mixture of anaerobic and aerobic microorganisms
- Displays high enzyme activity including protease, amylase, cellulose and lipase
- Is non-volatile and non-corrosive
- Is easy to handle and to use
- Displays good stability and shelf life

ODORITE **ULTRA** PRODUCTS

- Odorite Ultra Bio Floor & Tile Auto Scrubber
- Odorite Ultra Bio Floor & Tile Manual

Multi-purpose enzyme formulation concentrate

This product lifts the old grease and grime, showing the first sign that it is working. The bio-enzymes work to break apart the build-up of grease and organic waste on the floor and grout. A significant improvement in the floor's appearance will be apparent after the first wash, mop or scrub, and employees will notice improved traction (less slippage) than before.

Common applications include cleaning floors for quick service, restaurants, schools and industrial cafeterias, long term care and hospitals, grocery store floors (behind the counter) and floors in food processing plants. It eliminates biofilm (the feeding and breeding sources for pests) and will out-compete potentially harmful bacteria for the same food source. With routine cleaning, the effect is enhanced with each application until floors are truly deep cleaned.

ODORITE **ULTRA** PRODUCTS

- Odorite Ultra Plus Laundry Liquid
- Odorite Ultra Plus Laundry Powder 3%
- Odorite Ultra Plus Laundry Powder 3% 5kg Bucket

Six enzyme laundry detergent

Odorite Ultra Plus Laundry Detergent is a granulated, multienzyme laundry detergent solution allowing high wash performances at low temperatures. Odorite Ultra Plus contains a blend of six different enzymes, each offering primary stain removal and/or secondary wash effects such as whiteness/anti-redeposition, colour care, and fabric care. The six enzymes work together, exhibiting extra power when removing complex stains such as blood, candy, chocolate, coffee, tea, deodorant, dirt, fruit juice, grass, gravy, ink, ketchup, lipstick, oil, pollen, poop, salsa, sweat, wax and wine.

BENEFITS

- Extremely effective all-around stain removal and whitening effect, even at low temperatures
- An easy-to-use pre-formulated blend; only one preparation needs to be added to any wash - Odorite performs like a turbo-charge booster for your laundry
- Highly cost-effective, environmentally friendly, sustainability-enhancing solution at low temperatures
- Can be used in cold or warm water wash - reducing energy consumption
- Biodegradable formula - after washing the surfactants and enzymes will break down and can be absorbed back into nature
- Contains no added phosphorus
- Low in sodium and therefore grey water suitable

**EXTREMELY
EFFECTIVE FORMULA**

COST EFFECTIVE

**ENVIRONMENTALLY
FRIENDLY**

ODORITE ULTRA PRODUCTS

- Odorite Ultra DeepClean Concentrate 10X (Biological)
- Odorite Ultra DeepClean RTU Biological

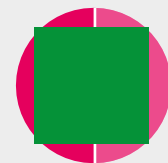

Bio-enzyme plus eco surfactant fat oil and grease cleaning technology for food processing industry

Utilising floor and hard surface cleaning technology with emc2 (extended microbial cleaning capability), double-action Odorite DeepClean is the latest innovation in cleaning technology. The patent-pending, advanced formulation technology for removing greasy soils provides superior, immediate cleaning of surface soils, comparable to industrial-strength floor cleaners. The bio enzymatic action penetrates deep into the pores of the surface to attack and remove embedded residual soils.

BENEFITS

- Specifically designed for cleaning floors and hard surfaces
- Deep-cleans floors and grout by removing the grease and grime that collects in the pores of the floor surface
- Eliminates the greasy floor coating that causes slipperiness
- Improves freshness by controlling odours from residual organics packed into irregular floor surfaces
- Eliminates the need for rinsing after mopping
- Degrades residual organic soils that help support insects and other unwanted pests
- Eradicates potential harmful microorganisms

ODORITE ULTRA PRODUCTS

- **Odorite Ultra DeepClean Enzymatic 30X Concentrate**

Up to 100 times Dilution Technology for all food processing hard surfaces

BENEFITS

- Increased effectiveness by comparison to high alkaline chemical cleaners, because of multi-enzyme action
- Safe for users and equipment (enzymes are safe and not harmful to man nor the environment)
- Ease of use – 30 times concentrated can be further diluted up to 100 times depending on the application
- Saves time, effort and money
- Enzymes are non-toxic, non-irritating, non-gaseous, non-flammable, non-pathogenic and non-hazardous
- Enzymes out-perform germicidal cleaners because they digest the host material where the germs and odour causing bacteria live and reproduce i.e. biofilm
- Advanced innovation in floor and hard surface cleaning technology - the first of its kind on the Africa market

BLUE MAC PRODUCT

- **Blue Mac Portable Toilet Fluid Concentrate**

Proprietary blend natural organic formulation for portable toilet systems (formaldehyde free)

Blue Mac Portable Toilet Fluid is designed for use in portable toilets including: construction site toilets; caravans, trains and busses; marine vessels; VIP portable mobile toilets; underground portable toilet in mines; and events (music, sport).

To accelerate the degradation of organic matter and provide exceptional bacteristatic and disinfectant properties for these applications. By harnessing nature's own technologies and importantly moving away from harsh, dangerous and health risk chemicals such as formaldehyde derivatives. This natural, organic biological solution is eco-friendly, safe, holds no health risk for the user of a toilet or the manufacturer or service agent to portable toilets.

FEATURES

- Septic and waste treatment
- Odour controller
- Wastewater treatment plant

URI POD PRODUCT

- Uri Pod

An innovative urinal “anti-splash back” bio device.

Malodour and poor hygiene in a men’s restroom is an age-old problem that, together with any evolution in urinals, has never really been adequately addressed – until now. Almost every urinal device on the South African Market is ineffectual with regards to anti-splash back, treatment of malodour (not masking malodour) and eradicating unwanted and harmful microorganisms.

What’s the solution? As a premium urinal accessory that successfully prevents splash, wipes out organics and eliminates malodours found in urinals and drain lines, the Uri Pod is the ultimate urinal accessory.

FEATURES & BENEFITS

- Reduces back-splash by as much as 90% while releasing a long-lasting pleasant fragrance
- A bio-enzyme tablet housed in the Uri Pod prevents malodours from stale urine for up to 30 days or 3000 flushes
- Unique ribbed and pin-cushion design prevents back-splash, ensures fast draining/flushing keeps the urinal clean and prevents even the smallest debris from falling into the urinal trap (avoiding drain blockages)
- Combined use with Bio Tech GTX a bio-enzyme cleaning formulation allows you to discontinue your conventional sanitiser
- Safe and easy to install in all urinal shapes, sizes, and styles, whether conventional, waterless or trough
- Unique anti-slip polymer feature keeps the device in an optimum position in the urinal
- The Uri Pod and its packaging is fully recyclable, ensuring safe disposal
- The most cost-effective product on the South African market when combined with Bio Tech GTX for cleaning the urinal and surrounding tiles

MICROZYME PRODUCTS

- A** • Microzyme Surf Clean 10XFF
- B** • Microzyme FOG Free 50gm Sachets (Grease Traps)
 - Microzyme FOG Free Bulk (Grease Traps)
- C** • Microzyme D60 100gm Sachet Brown (MOQ 10 Sachets)
 - Microzyme D60 Bulk
 - Microzyme D60 100gm Sachet Green Fragranced (MOQ 10 Sachets)
 - Microzyme D60 Green Fragranced Bulk

MICROZYME PRODUCTS

- **Microzyme Surf Clean 10XFF**

Unique bio-enzymatic formulation for cleaning hydrocarbons (oil, petrol, diesel and grease) from all surfaces found in urinals and drain lines

These formulations contain a blend of microbes developed to breakdown oily compounds. These include a unique hydrocarbon degrading Paenibacillus strain developed by Novozymes Biologicals and Rutgers University. Combining the residual effects of patented bio enzymatic technology with patent pending surfactant technology provides a product that is both safe and powerful.

FEATURES & BENEFITS

- A visually cleaner garage floor and driveway with less effort
- Enhance the office, factory and your homes curb appeal with a fresh, clean sidewalk
- Deep-clean tough stains in the workshop, factory garage and basement with a product that is safer for family and pet than the chemical alternatives
- More effective than a solvent-based product, yet is safe to use and friendly to the environment
- Use one product for a wide range of cleaning applications including garage floors, basements, outdoor furniture, tools and equipment

MICROZYME PRODUCTS

B

- Microzyme FOG Free 50gm Sachets (Grease Traps)
- Microzyme FOG Free Bulk (Grease Traps)

Fats oils and grease degrader

Organic wastes and wastewater from meat producing operations are usually treated in a "pre-treatment" process before being discharged into the sewer. This is done to reduce sewer charges by lowering the Chemical Oxygen Demand and Biological Oxygen Demand (the amount of inorganic and or organic material in the waste water). To allow this type of pre-treatment process operate properly, you require:

- The correct consortium and ratio of bacteria / bio-enzymes to be introduced into the system
- Agitation - to mix, break down any solids
- Aeration - to optimise bacteria activity

The key to proper operation of this type of pre-treatment is time. The special consortium of bacteria and enzymes in Fog Free work much faster and more efficiently than ordinary bacteria, but they still require time to digest the waste. The longer the retention time, the more organic matter will be digested, and the lower the COD and BOD of the eluent water. Thus, retention time is the most critical factor in determining how much of the products must be used in a regular treatment program.

MICROZYME PRODUCTS

- Microzyme D60 100gm Sachet Brown (MOQ 10 Sachets)
- Microzyme D60 Bulk
- Microzyme D60 100gm Sachet Green Fragranced (MOQ 10 Sachets)
- Microzyme D60 Green Fragranced Bulk

Premium products for the effective degradation of solid waste, pit toilets and septic tanks

In nature, all animal and vegetable matter is broken down and recycled into plant food by enzymes and bacteria. Microzyme D60 uses this same principle to degrade animal and vegetable waste. Like all living things, bacteria must eat to survive. Fortunately, certain types of bacteria will use the grease, hair, soap film and all the organic waste for food. Microzyme D60 is a blend of bacteria and enzymes. The bacteria are natural, not genetically-engineered and the concentration is the most powerful on the market. This is a proprietary blend of superior aerobic and anaerobic bacteria selected for their ability to degrade organic waste.

FEATURES

- Eliminates the need to clean grease traps and cable drains
- Eliminates the need to buy dangerous chemicals
- Eliminates the need to buy deodorant blocks (urinals)
- Eliminates costly compensation to employees that have been injured by using dangerous chemicals

CONSUMER BIO-ENZYME PRODUCT RANGE

- **Bio Tech Bathroom Cleaner
500ml Foam Spray**

Biotech Bathroom Cleaner is designed as a bio-technical aid to clean, sanitise and deodorise bathrooms, keeping them fresh and sanitized. Our specialised bio-enzymatic formula contains good bacteria which eliminates organic waste, reduces odour and cleans soiled areas.

When you don't really need to lush, and saving water is at the top of your "to-do" list, use a couple of sprays of our Bathroom Cleaner and let the yellow mellow without the smell or the germs.

The Biotech Bathroom Cleaner produces seven separate enzymes to ensure your bugs and organic materials are demolished, leaving surfaces that are biologically cleaned. With our bug eating product, cracks, crevices and pores are penetrated, removing the harmful organics and bad bacteria that accumulate there.

FEATURES

- Bathroom cleaning and odour control
- Penetrates cracks, crevices and pores of surfaces where organics accumulate, removing the organics
- Leaves a visually cleaner surface
- Provides long term odour control by removing the organics that cause odours and preventing their return
- Safe, non-toxic and environmentally friendly
- Bacillus Subtillus Bacteria (various strains): <1.0% Delete
- Bacillus Subtillus Bacteria: <5,0%
- Soft Water: <94%
- Bacillus consortium - the bacillus use the multitude of enzymes produced to break down the components of malodour and staining to provide microbial cleaning at the smallest level of dirt/contamination naturally.
- Plant based surfactants

Our Bugs Eats Yours

CONSUMER BIO-ENZYME PRODUCT RANGE

B

- **Odorite Enzymatic Kitchen Cleaner 500ml Foam Spray**

Ultra All Surface Kitchen Cleaner is foamy and eliminates kitchen grime with dual technology, combining superior green surfactant technology with enzymatic action. The enzymes work to break down fats and grease, while also eliminating starches which act as a glue (bioilm), trapping dirt and other organics on the surfaces. This powerful combination offers the exceptional ability to break down residual organic soils and eradicate bad odours.

Continued use removes layer upon layer of embedded grime (bio-ilm), preventing future build-up of organic soils, keeping the hard surfaces, floor and tiles truly deep-cleaned, smelling fresh and free of potentially harmful organisms and contaminants.

FEATURES

- Specifically designed for cleaning food contact surfaces
- Removes soap scum from tiles and floors
- Deep-cleans floors and grout by removing the build-up that collects in the pores of the floor surface
- Eliminates floor coating that causes slipperiness
- Degrades residual organic soils that help support insects and other unwanted pests
- Improves freshness by controlling odours from residual organics
- Eliminates the need for rinsing after mopping
- Effective against fungi, bacteria and yeasts
- Safe, non-toxic and environmentally friendly

Grease Busting

CONSUMER BIO-ENZYME PRODUCT RANGE

- **Odorite Enzyme Dishwashing Liquid 500ml**

Odorite Ultra Dishwashing Liquid has the power you need to ight tough grease and get the squeaky-clean dishes you're looking for. Our dishwashing liquid packs twice the punch, using half the liquid to clean more dishes and it's gentle on your hands too.

It contains no phosphates, has less surfactants and is powered by revolutionary technology comprising three active enzymes that deliver clean dishes, while preventing fat, oil and grease build-up in the drain.

FEATURES

- Highly active - only small amounts of dishwashing liquid required
- Remains highly active in both hard and soft water, and in warm or cold water
- Phosphate free
- Free rinsing - dishes can be left to air dry without streaking
- Biodegradable surfactants
- Very economical
- Contains a pleasant, fresh fragrance
- Will not dry out your hands and skin
- Less electricity required as it is effective in warm water
- Less energy is required to clean dishes
- Contains no caustic

We Mean Clean

CONSUMER BIO-ENZYME PRODUCT RANGE

- **Odorite Grime Away
500ml Foam Spray**

Grime Away All Purpose Cleaner is a 100% natural citrus cleaner, and is suitable for all-purpose use, both indoors and outdoors. Indoors, it removes all soils from carpets and upholstery, as well as hard surfaces and floors.

Outdoors, Odorite Grime Away All Purpose Cleaner can be used as a patio and garden furniture cleaner, braai cleaner, driveway oil spotter and general degreaser.

Its Applications are Endless:

- Use on all washable surfaces indoors or outdoors - from floors to walls and everything in between.
- Use to remove tar, grease, oil, ink, toner, adhesives, sealant, glue, polish, fat, wax, crayon, blu-tac, plasticine, lipstick, chewing-gum, smoke damage and even graffiti.
- Safely strips all types of floor polish and adhesives without damaging the flooring.

FEATURES

- The product is quick splitting, meaning it separates from oils - so you can re-use the cleaning solution, and the oils are removed before disposal
- Contains advanced surfactant technology, coupled with a powerful natural orange solvent
- Lifts soils and allows them to be rinsed away with water, including chewing gum and tar
- Pleasant, natural orange fragrance
- Powerful cleaning ability
- Safe, non-toxic and environmentally friendly
- 100% natural citrus cleaner
- Based on the natural solvent extracted from the peel of citrus fruits
- Plant based surfactants

Grime & Dirt Demolishing

CONSUMER BIO-ENZYME PRODUCT RANGE

- **Odorite Laundry Detergent Powder 2,5kg Bucket With Scoop**

Odorite Ultra Laundry Powder is a multi-enzyme detergent which offers superior cleaning performance, at low temperatures. Our laundry powder is the only one in South Africa that contains six enzymes, each offering maximum stain removal (even on complex stains).

With this detergent, washing comes out whiter and brighter, soils are eliminated rather than being redeposited elsewhere, and both the fabric and the environment are cared for. The slightly clammy granules ensure there's no wastage, and prevents the user from breathing in any airborne particles

**Dirt Happens
Gentle on Clothes, Tough on Dirt**

FEATURES

- Extremely effective, all-around stain removal and whitening effect, at low temperatures
- Proven to remove the following stains; blood, candy, chocolate, coffee, tea, deodorant, dirt, fruit juice, grass, gravy, ink, tomato sauce, lipstick, oil, pet stains, pollen, poop, salsa, sweat, wax, wine and more
- Booster effect from six-enzyme cleaning process, making even set-in stains disappear, naturally
- Highly cost-effective - environmentally friendly, sustainability-enhancing solution at low temperatures
- Reduces energy consumption
- After washing, the biodegradable surfactants and enzymes will break down and can be absorbed back into nature
- Contains no added phosphate
- Safe, non-toxic and environmentally friendly

ABOUT GREEN WORX CLEANING SOLUTIONS

Green Worx Cleaning Solutions is ISO 14001 certified and supplies innovative, environmentally responsible, biotechnology products based on the use of natural microbes and enzymes. In such, Green Worx supplies green cleaning and sanitation solutions, pollution control and environmental remediation products to industrial and commercial entities, as well as to consumers. Green Worx prides itself on its associations with global leaders providing innovative, effective and high-quality products and solutions to meet specific customer needs.

2016 : Green Worx was presented with the Award for runner up in the Green Technology Innovation category of the Mail & Guardian (M&G) Greening the Future Awards. In the same year, **the company won the 2016 South African Frost & Sullivan Award for New Product Innovation.**

2017 : Green Worx is awarded MECA Middle East Consultancy Association!
In today's challenging times, you need to stay informed and on top of your activities. MECA provides Greenworx with information and connects us with the people and programs that will help us achieve our business and career objectives.

Green Worx was awarded the South Africa - Company of the Year 2017 (Biotechnology) award by the ACQ Global Awards.

Green Worx is Global GreenTag certified, confirming our products are truly green. We became a Green Building Council of South Africa (GBCSA) member to assist in maintaining the "as-built" green grading. The GBCSA awarded the Green Star Existing Building Performance certification to Green Worx. Green Worx's FMCG brand is launched, bringing green cleaning to SA's homes. **We also won the MEA Markets' Most Sustainable Cleaning Product Manufacturer 2017 Award.**

Green Worx won the "Green Business Award" by the African Leadership Awards and was a finalist in both the "Sustainability Blank Canvas" and "Management of Systems" awards categories at The Da Vinci tt100 Business Innovation Awards Programme.

2018 : Green Worx was presented with the **Award for Innovation in Sustainable Biotechnology Cleaning Products** and the **Most Sustainable Cleaning Product Manufacturer 2018 by Mea Markets 2018 - South African Business Awards.**
